# TERRORBULL GAMES CATALOGUE

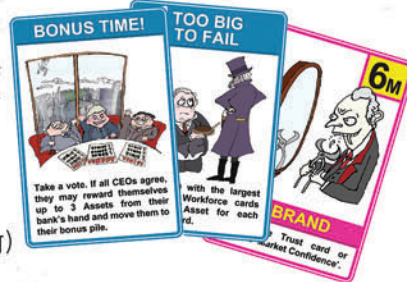

We make satirical, seditious, subversive games. Our games have been used in art galleries, lecture halls, classrooms and TV sitcoms. They have been seized by the police, banned from toy fairs, vilified by the tabloid press and yet they draw accolades and praise from the likes of Amnesty International, the Nobel Peace Center and globally respected, award-winning journalists. Iconic, thoughtful and always fun, it's safe to say no one makes games like we do.

Secure the oil, build your empire, fund & fight terrorism! Everyone starts with the best intentions. Then things start to get cramped. Then you notice your neighbour has more oil than you. Before long, war is waged, nukes are dropped, revolutions are fought and terrorists are doing your dirty work, before turning on you... This is the 'War on Terror' - a brutal dog-eat-dog fight for truth, justice and a decent slice of oil-rich land. It is a struggle in which morals and ethics are frequently sacrificed in pursuit of the ultimate dream: world domination. *Liberation!*
